

REMNANT NIMBUS BATTLESUIT

Preparation: We recommend washing resin parts in warm (not hot) soapy water to remove any residual mould release agent. Use sharp clippers to remove parts from the frame. Pulling parts from the frame without clipping may result in damage to delicate parts. Use a hobby knife, seam scraper or file to remove any mould lines or frame joint nubs left by the clippers. Thin resin parts sometimes warp during the curing process - these can be straightened by placing in hot water until they soften, gently reshaping, and then dropping in cold water to quickly re-harden.

Assembly: For best results, use superglue (cyanoacrylate), or a rapid-setting epoxy glue. Plastic cement will not work on resin models.

PARTS LIST

01	Head	From Militus Sprue (optional)
02	Body	01-12 Militus Heads
03	Incursion Blaster Arm	13 Aerial (for head 07)
04	Pinpoint Scanner Arm	15 Boostpack
05	Sniper Rifle Arm	L18 Left Jet Front
06	Sniper Left Arm	L19 Left Jet Nozzle
07	Cloak Generator	L15 Right Jet Front
08	Hologram Projector	R16 Right Jet Nozzle
09	Thermal Tracker	
Base	MEBS04 - 36mm Round Base
