

MAELSTROM'S EDGE®

EPIRIAN FOUNDATION – UNOFFICIAL UNITS

The units in this document are based on Iain's conversions and kitbashes of various Maelstrom's Edge kits and/or models from other miniatures ranges. You can find the original modeling articles in the Hobby section of the Maelstrom's Edge website. These are not 'official' units, and so you can choose to use these modeling articles as a guide for your own conversions, come up with your own versions, or use any other suitable models you have in your collection. You should check with your opponent before using these rules to make sure they are ok and familiar with them.

Note that these rules are intended as just a fun way to use some of your conversions or non-Maelstrom's Edge models in your games. These units are not a 'canon' part of the Maelstrom's Edge background, nor are these rules an official part of the game, so you should only use them with your opponent's consent.

Any abilities with a name in **ORANGE** text are unofficial rules created for this force list. Abilities with **BLACK** names are identical to abilities found in other Maelstrom's Edge factions.

THUNDERBOLT SENTRY DRONE

Little more than a weapon mount added onto a multi-purpose motile unit with a low-range bot processor, the Thunderbolt is a common sight on frontier worlds lacking the budget for more advanced security bots. Thunderbolts will trundle around their assigned patrol areas, tracking for potential threats. When more direct action is required, nearby Bot Handlers can link into the Thunderbolt's comms network, prioritizing enemies and providing more advanced targeting data.
